

Attends® Cover-Dri

Attends Cover-Dri are a range of surface protection products that can be used for light to moderate urinary incontinence and clinical procedures where non sterile containment is required.

1 Discreetly coloured, non-slip, waterproof back sheet to ensure the product stays in place.

2 Individual absorbent cushions quickly absorb fluid, whilst drainage channels rapidly distribute the fluid without pooling.

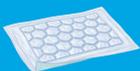

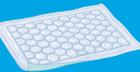

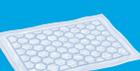

3 All round leakage barrier reduces the risk of leakage.

4 Super absorbent core for improved leakage protection, skin dryness and odour protection. Attends Cover-Dri Special Care has no superabsorbents and is designed to absorb large amounts of fluid quickly.

5 Attends Cover-Dri Plus 80x170cm has tuckable wings which can be used on beds to securely keep the pad in place.
